## Work Experience

**Wipro Technology** | Project Engineer

**Nov, 2021- Nove,2023**

- Developed automated test scripts using industry-standard tools such as Selenium, or similar frameworks.
- Implemented continuous integration and continuous deployment (CI/CD) pipelines to automate testing processes and ensure early detection of defects.
- Designed and executed test cases for various software applications, including web, mobile, and desktop applications.
- Conducted regression testing to validate software changes and ensure overall system stability.
- Collaborated with cross-functional teams including developers, product managers, and quality assurance analysts to identify and resolve software defects.
- Utilized version control systems such as Git to manage test scripts and track changes.
- Analyzed test results and generated comprehensive reports for stakeholders, including recommendations for further improvements.
- Contributed to the development and maintenance of test automation frameworks to enhance efficiency and scalability of testing efforts.
- Experienced in developing scalable and efficient backend solutions using Python frameworks like Django, with a focus on building RESTful APIs and integrating with databases like MySQL and MongoDB.

## Skills

**Programming Language** - Python, Java, JavaScript

**OS** - Linux | Window

**Database and Language** - MySQL | SQL

**Version Control Tools** - Git | Github | VS Code

**Web Development** - Django | RestAPI | HTML | CSS

CI/CD | AWS | OOPS | Problem Solving | Selenium WebDriver | Automation

**Soft Skills** - Collaboration | Communication | Teamwork | Time Management

## Projects

### E-commerce App

*Python, Django, HTML, CSS*

- This web application is built using Django and Python programming languages, offering a seamless shopping experience with features like a cart, payment gateway integration, and product ordering.
- Users can add products to their cart, view cart items, and update or remove items as needed

### Crud Operation

*Python, Django, HTML, CSS*

- This Django project demonstrates basic CRUD operations for managing products, allowing users to create, view, update, and delete product listings.
- It includes functionalities like adding product details, viewing a list of products, updating product information, and deleting products as needed.

## Education

**Dr. A.P.J Abdul Kalam Technical University, Lucknow, India**

**2017 - 2021**

- Computer Science Engineering | CGPA: 8.1

**BIC Nawabganj Bareilly, India**

**2016 - 2017**

- UP Board (Class XII), Aggregate: 90%

**BIC Nawabganj Bareilly, India**

**2014 - 2015**

- UP Board (Class X), Aggregate: 89%
